Consent for Disclosure of Immunization Information to Local and State Health Departments Immunizations are an important part of keeping our children healthy. School and State and Local health departments must monitor immunization levels to ensure that all communities are protected from potentially life-threatening diseases and, if necessary, respond promptly to an emerging public health threat. It is important that disease threats be minimized through the monitoring of students being immunized.

Sharing immunization and personally identifiable information including student's name, date of birth, gender, and address with local and state health departments will help to keep your child safe from vaccine preventable diseases. The Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. § 1232g, requires written parental consent before personally identifiable information from your child's education records is disclosed to the health department. If your child is 18 or over, he or she is an "eligible student" and must provide consent for disclosures of information from his or her education records.

You may withdraw your consent to share this information	n in writing at any time.
I authorize QUINCY MIDDLE SCHOOL to release my confidence of Health and Human Services and Local He will be used to improve the quality and timeliness of imm with Michigan Law.
